

Isabel Villanueva is a biologist. She completed her degree in Madrid at Alcala University in 2003 with the speciality of Clinical biology and also environmental biology. During her studies she started to work for the pharmaceutical industry with a fellowship. Once she completed her degree she continued working but for the Spanish Breast Cancer Research Group (GEICAM), she was working there until 2004 as clinical trial assistant and clinical research associate. Her next step was to start working in a CRO, Quintiles. Here she was during two years working for different sponsors as Clinical Research Associate. In 2006 she joined Charles River Laboratories and during this year the company was bought by Kendle, another multinational CRO. She was working at Kendle until 2011. Finally the company became part of INC research in 2011. During those years Isabel took more responsibilities as Lead CRA coordinating a group of people working in the same clinical trial and been contact point for the Sponsors. She had experience in projects involving different therapeutic areas: paediatrics, cardiology, oncology and immunology. Finally in January 2012 she joined GENVIP as Project Manager. In this job position she is working for the EUCLIDS project (FP7) coordinating the Spanish network and the communications between SERGAS and the other partners of the consortium.
